

ARGO

Argo

The world has infinite noise. The scarcest resource left is a private conversation with yourself.

Konrad Gnat, solo founder

Live on iOS and web since 2026-08-12

Open source

myargoquest.com

Wiring Solana wallet sign-in and wallet-derived encryption this week.

PROBLEM

Founders don't lack tools. They lack headspace.

The best idea you'll have all week happens at 11pm, half-formed, with nowhere private to catch it before the moment passes.

SOLUTION

Argo is the private foundry: where a raw, tangled thought gets hammered into shape before it ever becomes a pitch, a post, or a product decision.

“Nobody can read it, not even us. It's architecture, not a policy.”

Zero-knowledge

Encrypted on your device with a key our servers never see.

Open source

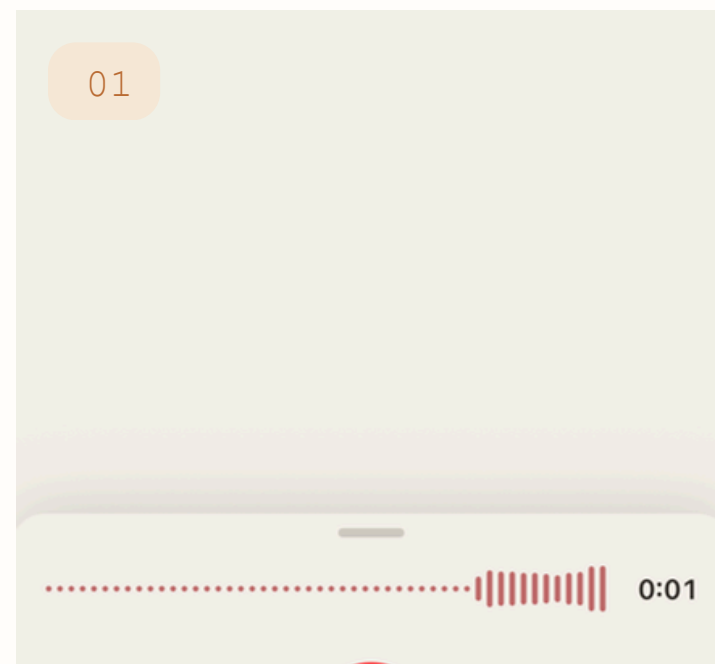

You don't have to take my word for it.
You can read the code.

Confidential inference

Even the AI step runs in a TEE that never sees plaintext in the clear.

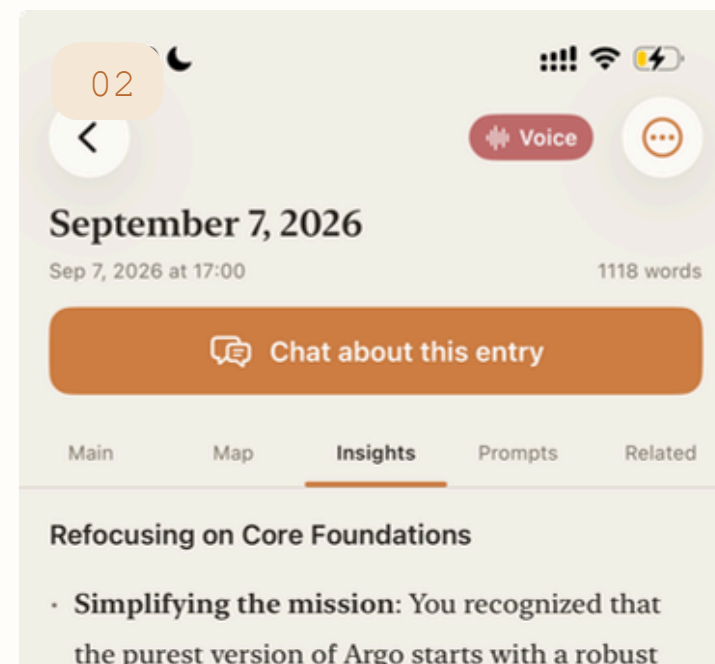

LIVE DEMO

Speak the raw version. Watch it get untangled, made shareable, and echoed back three times today with advice that's actually yours.

Voice entry

Talk unfiltered. Captured and transcribed.

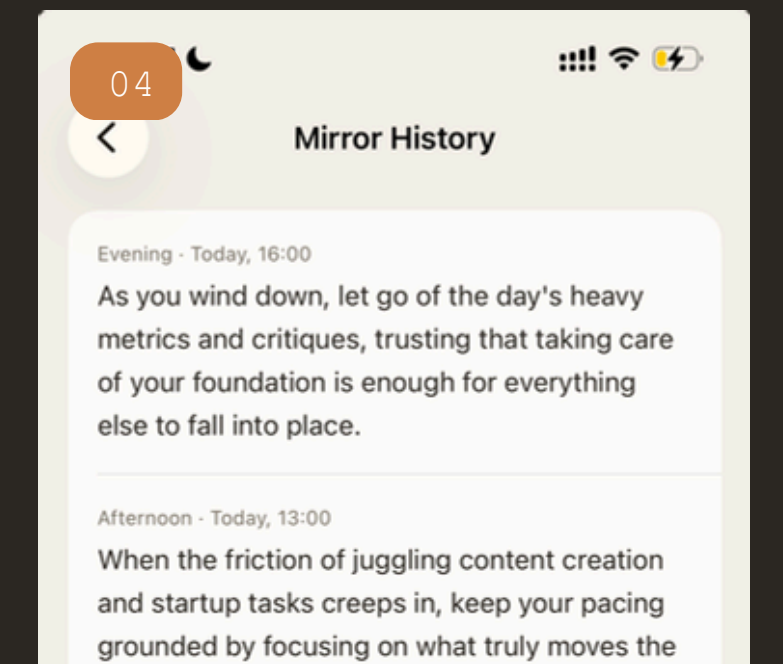

AI recall

Read back tightened, plus something you wrote months ago.

Haiku card

Three lines from today, abstracted, safe to post.

Daily Mirror

Morning, afternoon, evening. Advice grounded in your own journal.

Your Soul is the record you showed up. Your subscription is the membership built around it.

Soul, soulbound NFT

A permanent, non-transferable record that you showed up. Not an access pass.

Argo Pro

\$19.99 / month

The membership: AI agent workshops, creativity and STEM classes for kids, community Discords, exclusive events.

100

Events in person and online

10

Paying subscribers

Live on iOS and web. The AI power users course has run paid in person: YouTube livestream, Singapore, Malaysia and Cambodia.

WHY NOW, WHY SOLANA

Model quality is solved. Headspace and trust are not. Solana is the credential layer for a membership earned by consistency, not bought with capital.

One wallet, job 1

Signs you in

Sign-In with Solana replaces the account. Authentication with no email, no password, no us.

One wallet, job 2

Derives the key

ed25519 signing is deterministic by protocol, so the same wallet always derives the same key material. The primitive sRFC-00007 recommends.

One wallet, job 3

Holds the record

The soulbound Soul, live on Base today, never bought, sold or transferred. Solana-native is the next step.

SHIPPING THIS WEEK

Sign-In with Solana as the wallet-derived encryption key, the KEK.

COMPETITION

Five paid products prove reflection with AI is already a market, not a bet. Nobody else turns the practice into a credential.

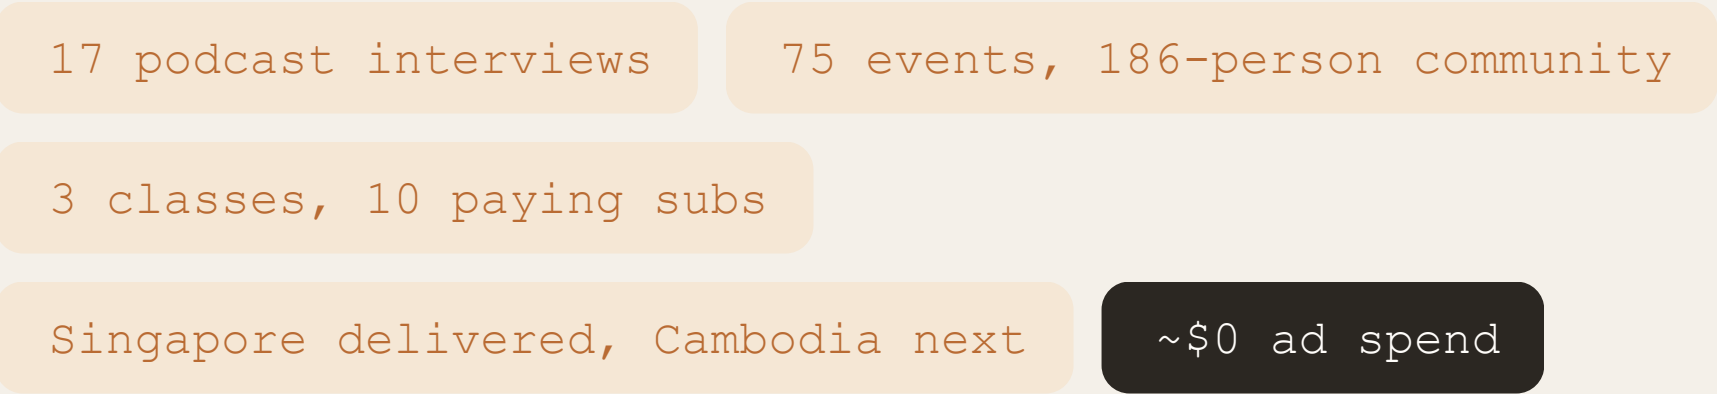

PRODUCT	PRICE	WHAT THEY DON'T DO
ChatGPT Plus	\$20/mo	General, stateless, no privacy guarantee, closed source
Claude Pro	\$20/mo	General, stateless, no persistent private memory, closed source
Day One Premium	~\$2.92/mo	A vault with no AI memory
Rosebud / Mindsera	\$8-15/mo	Text-only, session-shaped, no wallet-tied sovereignty
Argo	\$19.99/mo	Client-side encrypted, wallet-secured, open source, a soulbound practice record, paired with a paid membership community

GO TO MARKET, NEXT THREE MONTHS

Not a funnel, a flywheel.

“You don't get momentum from one big push. You get it from pushing the same wheel in the same direction until it turns itself.”

Jim Collins, Good to Great

THE NEXT THREE MONTHS

Ship Sign-In with Solana as the encryption key.

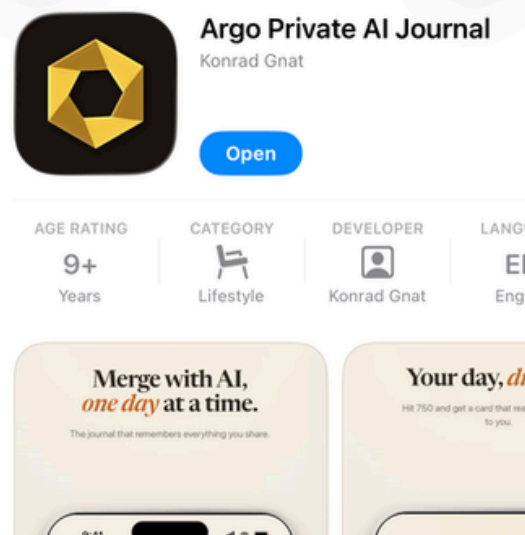

Grow the paying cohorts that already convert.

Keep the podcast, events and courses feeding the top of funnel at near zero cost.

TEAM

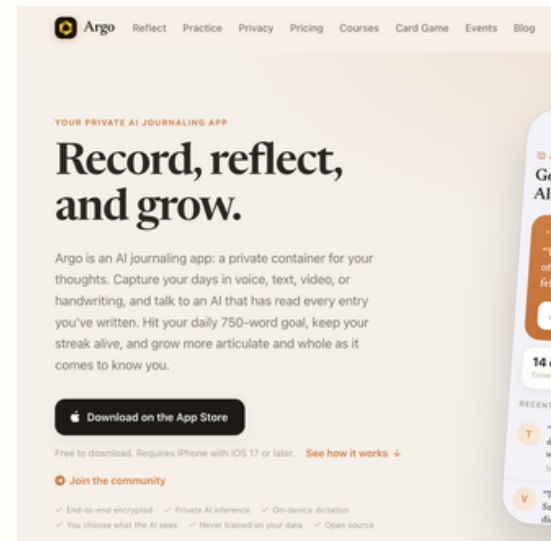

Konrad Gnat, solo founder

True builder sovereignty starts in private, before anyone is watching. I built the whole stack that way.

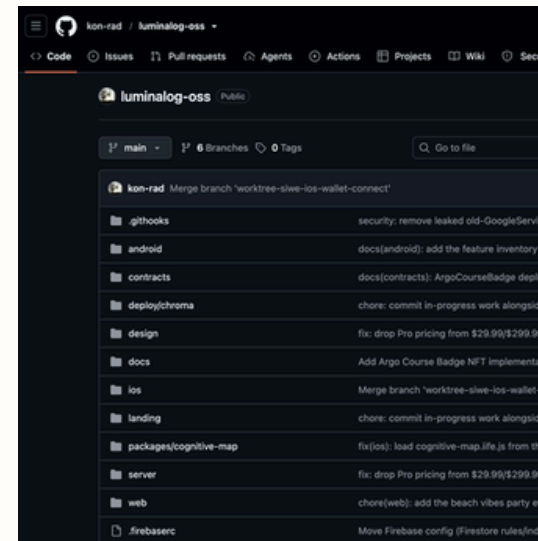

iOS

SwiftUI, live on the App Store

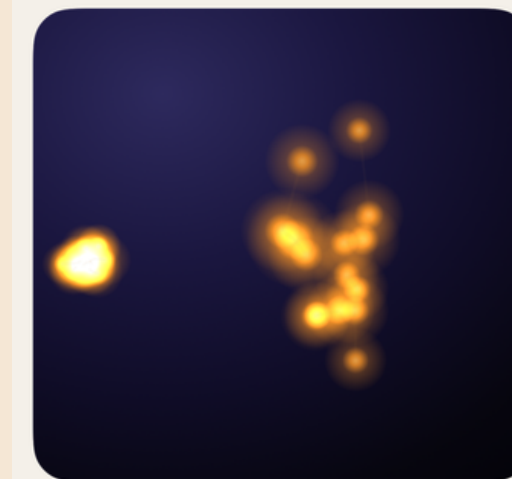

Web

Next.js,
myargoquest.com

Server

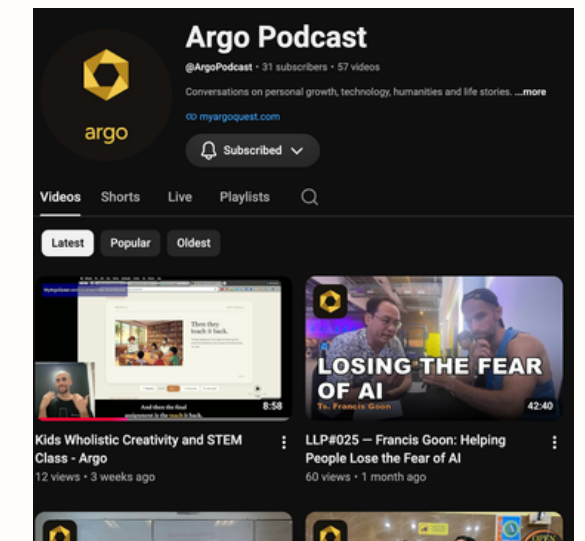

Node, Express, RAG,
open source

Public on Base: shows your first name + journaling stats on-chain

Onchain

Solidity on Base, now building Solana

Content

Podcast, events,
courses, community

THE ASK

Not a prototype, not a roadmap. The private conversation infrastructure is real, and you can join it tonight.

ASK ONE

Prize support

Earmarked against engineering time to ship Sign-In with Solana as Argo's encryption key this quarter.

ASK TWO

One pilot partner

A Solana wallet team or a Solana-native community, to co-design the flow and run the first cohort authenticating and encrypting their journal through a Solana wallet.
