

Post your truth on-chain

Problem

**Compensation in crypto is a black box,
and the anonymous voices trying to
expose it can't prove they're real.**

Solution

**An anonymous social network for
crypto jobs and projects, powered
by a ZK identity layer.**

Why Now

- **460,000+ Web3 professionals worldwide, growing job landscape**
- **AI training data licensing is a fast-growing market**

Why Solana

- **Growing Zero-Knowledge tooling ecosystem to build on**
- **eg; Reclaim Protocol (zkTLS), Light Protocol, Helius**

Traction

- Seeding through crypto communities & networks
- Pre-seeded posts to gain visibility and set the stage

Business Model

- Aggregated salary & compensation reputation dataset/API

Go-To-Market

- **Month 1: seed with personal Superteam network, pre-populate 10-20 real anonymized topics**
- **Month 2: pick one community as beachhead, pilot with 3-5 Web3 communities**
- **Month 3: expand via hackathon/conference side-events (Solana Breakpoint) targeting event reviews as a second use case**

Future Plans

Anonymous, verified reviews are the entry point, looking to expand the platform expands into private, verified payroll: companies pay contributors directly through us, with payment privacy built in.

Long-term vision

One platform where trust, reputation, and payments all live together, the infrastructure crypto work has never had.

- **In crypto since 2021**

The ask

- **Support to build out the zero-knowledge identity layer and get it production-ready**
- **Access to the right crypto communities and partners to bring this to scale**
