TECHNOLOGIES

Fintech for a new generation

The Challenge

People think crypto is private, but it's usually not. This vulnerability exposes users to surveillance and risk. Hard to find privacy in crypto.

Traditional bank cards can flag and block legitimate crypto transactions and non-crypto transactions, creating friction and unreliable spending locally and internationally.

Limited options for spending crypto or converting it into real-world value. Most cards get blocked when travelling internationally.

Private crypto companies can cut corners with little oversight or accountability, spending company funds wherever they want.

The Solution

Swift and low-cost transactions with unmatched privacy — one of the only solutions of its kind.

DGEN powers the next wave of crypto adoption through speed, privacy and usability.

Seamless, private way to spend your crypto — one of few worldwide.

Launching publicly on the Canadian stock market in about 1 month. Company Financials & Team are fully transparent

Two Live Products,

Privacy focused crypto card with industry-leading spending limits, multi-level referrals and white-label partnerships available.

- Multi-Network Support
- Email Crypto Transfers
- Offshore KYC

Non-custodial crypto wallet where you can swap 3,500 coins across 300 blockchains and intelligent routing.

- Intelligent liquidity aggregation
- Buy crypto with debit/credit card
- A.I. Chatbot (Google's Gemini A.I. Tech)

DGEN Visa / Mastercard

Send crypto or USD to other DGEN users instantly using just their email — no wallet addresses required.

Hold USDT, USDC, or USD directly in your card balance. Switch seamlessly between stablecoins and fiat.

Industry leading card limits — \$50k per transaction, \$250k daily, \$1M monthly & unlimited card quantities per user.

KYC data held privately offshore. Zero reporting unless flagged for serious illegal activity — your privacy, protected.

DGEN Wallet

A private sidechain that masks transaction amounts — exclusively operated by our public company.

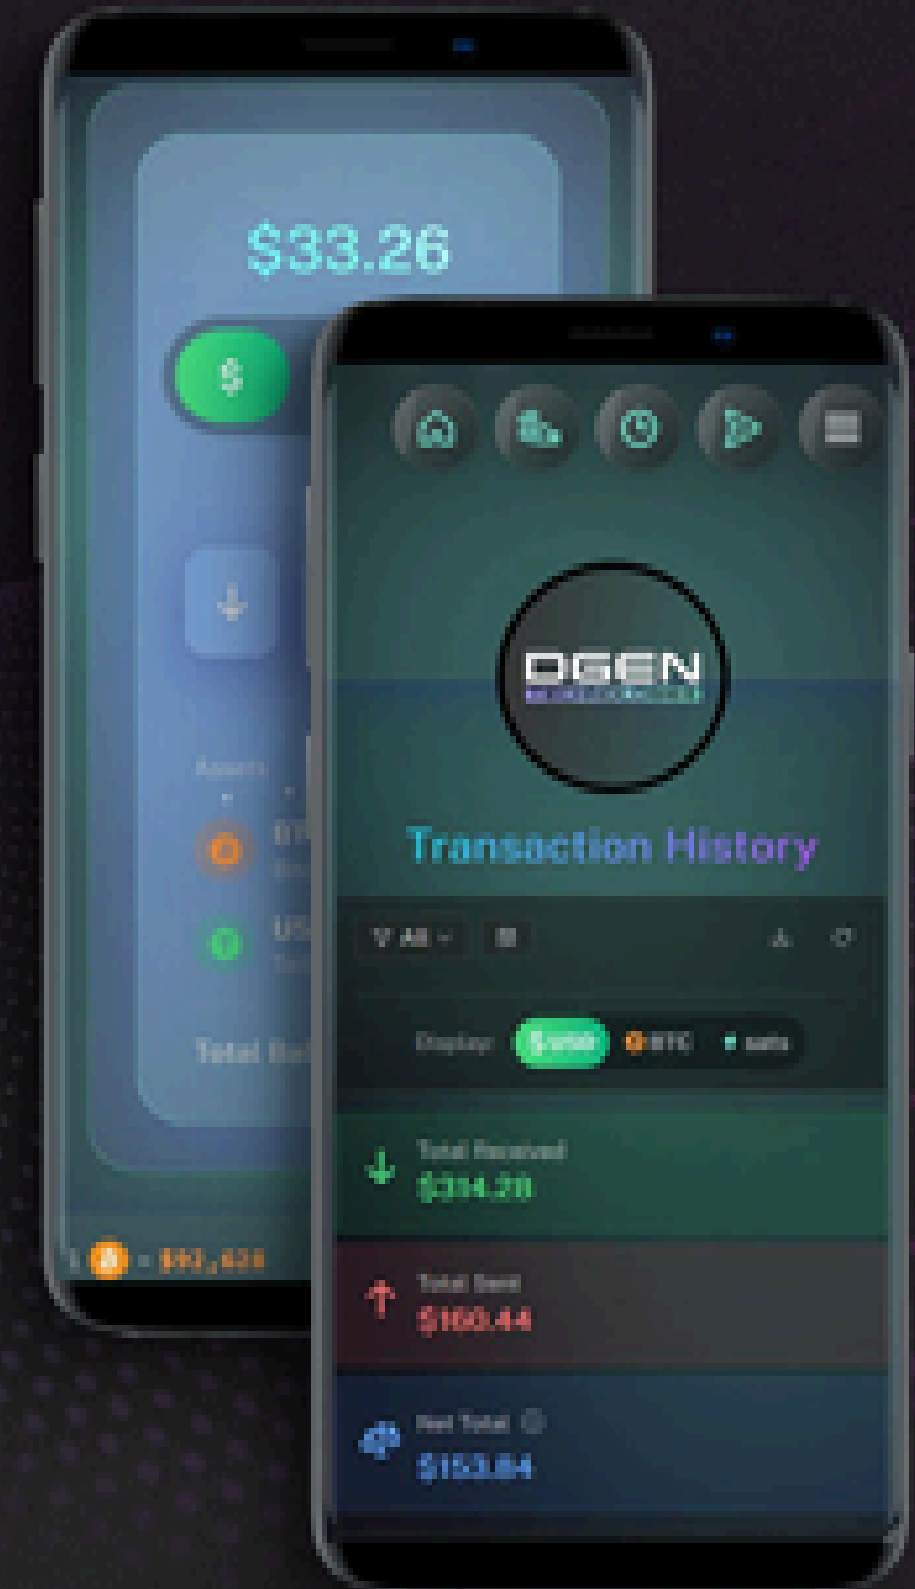

Enable crypto payments for businesses globally. Accept Bitcoin and stablecoins at checkout.

Automatically finds the best prices across exchanges globally — maximizing value on exchanges and fiat on-ramping.

Trade across 300 blockchains, non-custodially without KYC. No need to use exchanges who can censor/freeze your funds at any moment without notice.

Send and receive Bitcoin anywhere in seconds. One of the only globally with Lightning network support.

Powered by Google's Gemini 2.5 Flash engine.

Self-Custody Wallet Value

Wallets like Ledger, MetaMask, Coinbase's Wallet and Cash App validate strong global demand for crypto wallets.

MetaMask

- Parent company Consensys was valued at \$7B in 2022
- IPO targeted ~2026

Ledger

- Hardware wallet provider
- Potential ~\$4B IPO in 2026

BitGo

BitGo

- Institutional digital asset infrastructure
- Recently debuted at ~\$2B valuation

Unlike traditional self-custody wallets, DGEN integrates enhanced privacy-first architecture, advanced transaction masking features, ecosystem-native utility and other unique features.

Revenue Streams

A percentage fee applied to wallet transfers (on/off-ramping) and card spending, currently set at a 2% load fee.

4-tier commission structure driving viral user growth. One of the only fintech apps on the global market currently doing this.

Licensing fees + revenue share from enterprises deploying branded DGEN Cards/Wallets — exponential scaling with B2B adoption.

Strategic crypto/asset allocation yielding crypto returns.

Premium brand placements across our platforms.

Selling anonymized, aggregated insights/data on DGEN card user purchases.

Cole Goodwin | CEO

11+ years in cryptocurrency and formerly Director of Operations at Coinos, he enabled crypto payments for 1000+ businesses across 18 countries and played a key role in elevating Vancouver to #3 globally (#1 in North America) for Bitcoin/Lightning-accepting merchants.

International Speaker in 11 countries at 80 events, at premier conferences including Learning Bitcoin, Bitcoin Rodeo, Bitcoin Asia, Token2049 Singapore, Blockchain Futurist, and has hosted over 100 Bitcoin educational events.

Prior owner of a tower construction company having built over 10 towers and up to 4 towers simultaneously across Vancouver & Calgary demonstrating proven large-scale operational leadership.
