

TOKEN LEDGER

Institutional-Grade Financial Data & Accounting for Digital Assets

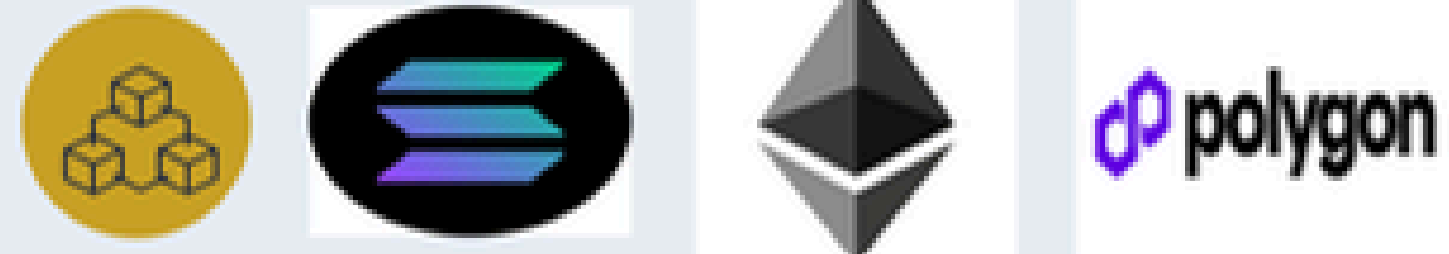

*By Dave Chew CPA
& Christopher Hansen*

The pain to adopt digital asset for institutions

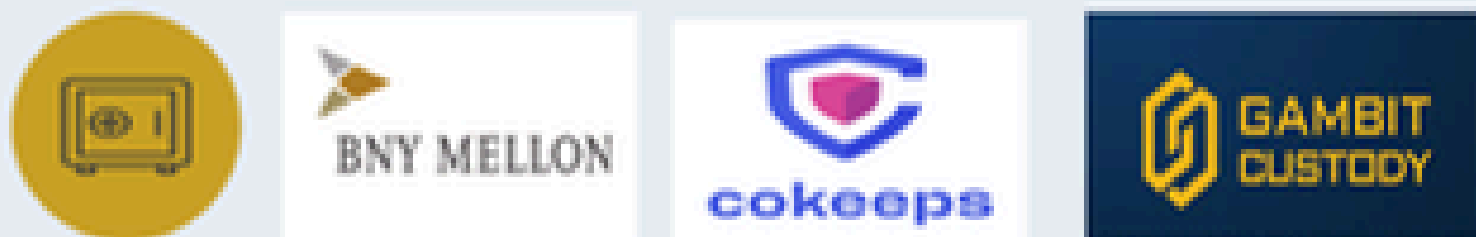

Multiple wallets

Balances sit in hot, cold and staking wallets, each with its own transaction history.

Multiple chains

Assets move across blockchains with different transaction formats and finality rules.

Multiple custodians

Holdings are split between self-custody, third-party custodians and sub-custodians.

Various exchanges

Trading runs through several venues, each with its own statements, fee treatment & complexity.

Increasing adoption of digital assets creates complexity for traditional accounting system

Legacy systems can't keep up

Current accounting systems are not built to handle the complexity of digital asset accounting, reconciliation, and transaction verification.

E.g. : Company ABC receives stablecoin payment from an overseas supplier and later invest into crypto assets and converted some to fiat money

Regulatory and governance requirement

Institutions adopting digital assets face increasing governance and regulatory requirements, raising the bar for controls, transparency, and reporting.

e.g. Global regulation is fragmented

THE SOLUTION

USP: One financial data and accounting layer for every digital asset your business touches

Unified Ledger

Wallets, exchanges, custodians and DeFi in a consolidated subledger.

Data Integrity

SOC 2 Type II certified, ISO 8000-51:2023 data quality.

Integrations

Syncs entries to Xero, QuickBooks and major ERPs accounting systems.

Audit Ready

Reporting follows the latest accounting standards (IFRS or IAS).

How Token Ledger works

DIGITAL ASSET ACCOUNTING INFRASTRUCTURE

Your **CFO** for the tokenized
finance world

WHY NOW?

Tokenised assets to reach \$18.9T by 2033, and stablecoins are already the settlement rail

Tokenised real-world asset market size

Ripple with BCG, 2025

Tokenised assets grow from \$0.6T in 2025 to \$9.4T by 2030 and \$18.9T by 2033, a 53% CAGR. The conservative case still reaches \$12T.

IMF, April 2026

Stablecoins now settle \$1.8T a month, 97% dollar-denominated, and act as the bridge into tokenised markets. The IMF ties that role to safe reserves, legal finality and governance.

Source: Ripple and BCG, Approaching the Tokenization Tipping Point, April 2025; IMF Notes 26/01, Tokenized Finance, April 2026.

BUSINESS MODEL

Two packages, priced to scale with client complexity

Startup

Web3 startups & funds

- i.e. quarterly financial accounting and reporting on their consolidated digital assets

- ✓ Positioned as outsourced CFO
- ✓ Core ledger & IFRS reporting
- ✓ Standard exchange & wallet coverage
- ✓ Email + chat support

From US\$500/mo

Institutional

TradFi & scaling Web3 firms

- i.e. monthly/quarterly financial accounting and reporting on their consolidated digital assets
- Work with accountants for the asset valuation recording

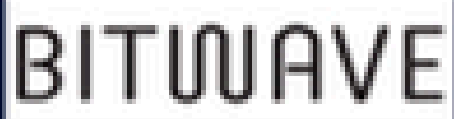

- ✓ Comply with latest regulation and latest accounting standards
- ✓ Multi-entity consolidation
- ✓ Priority Asia exchange & custody integrations
- ✓ Dedicated CSM + SLA

From US\$6,000/mo

Revenue scales with entity count, transaction volume, and assets under management — recurring, multi-year enterprise contracts.

COMPETITIVE LANDSCAPE

Built for Asia and TradFi focused, where relationship and trust matters

	 Token Ledger			
Regional focus	Asia-focused	Europe and US	Israel and US; part of Fireblocks	US
Accounting standard	IFRS/IAS by design	US GAAP and IFRS	Multi-book: IFRS plus local GAAP	US GAAP, IFRS, FASB fair value
Local integrations	Asia exchanges, custodians, banks	20+ exchanges; thinner emerging chains	Broad multi-chain and DeFi cover	40+ chains and major ERPs
Client profile	Web3 startups and <u>TradFi</u> focused	Regulated enterprises, asset managers	Crypto-native funds and infrastructure	Large US enterprises and exchanges
Data Assurance	SOC 2 Type II, ISO 8000-51:2023	SOC 1, SOC 2 Type I and II	Not published separately	SOC 1, SOC 2 Type II

*TRES Finance was acquired by Fireblocks for \$130mil (7x return) on Jan 2026

A two-track GTM: Web3 builders & TradFI entrants

Track 1 — Web3 Startups (ventured backed)

- Acquire founders whom I have established relationship with them
- Partner with Web3 Community and Fintech/Web3 VC – i.e Superteam, Offchain, Supersycrypt, Appworks, Blockchain Founder Fund, Amber & etc
- Partner with regulators sandbox participants (BNM & SC)
- Support their growth: start with core ledger, upsell multi-entity consolidation

Track 2 — TradFi : Bank, Asset Managers, Brokerage Firm

- Set up Training Academy to educate the market and convert them to corporate clients
- Lead with IFRS compliance and audit-readiness as the primary buying trigger
- Establish a strong track record with FI clients early
- Partner with Big 4 firms for referral to their clients adopting digital asset

EARLY TRACTIONS

Private Beta Users signed up in 1 day!

- to test our digital asset accounting and reporting features

- 5) Aquoao.xyz
- 6) Content DC
- 7) Agent CTOS
- 8) SODA
- 9) HEXO.Fun

- 10) Kuluwa
- 11) Breeze Pocket
- 12) Aether
- 13) LP Agent

EARLY TRACTIONS

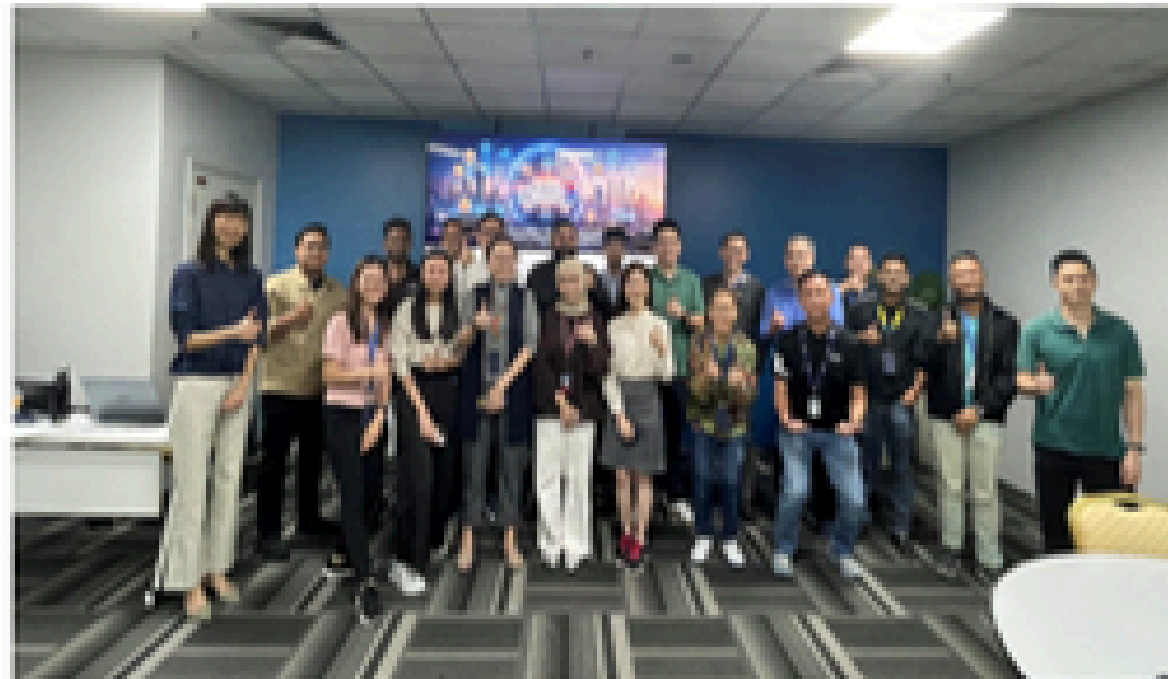

Convert my Web3 training FI clients for POC

ROADMAP

From private beta to commercial launch and agentic AI Tokenized Finance inside 24 months

TEAM

Built by accountants for accountants

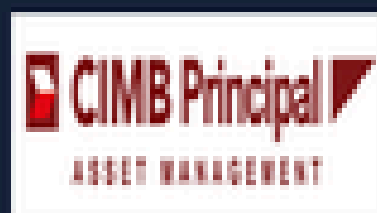

Dave Chew

CPA (Aust.), CA (M)

Founder and CEO

- 15+ years experience in TradFi and fintech/Web3 - accountant specialized in banking and asset management
- Founder of HomeCrowd, first company received regulatory approval for online lending license
- HRDC certified - Web3 trainer for TradFi

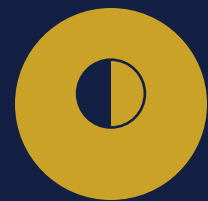

Christopher Hansen

CTO

- AI first – full stack software developer
- Built and configured an AI agent with Telegram integration
- Rapid software prototyping through hackathons and personal projects

THE ASK

Help us become the financial accounting layer for digital assets in Asia

More private beta testers / community feedback

Web3 finance teams willing to run a month of books on the beta and tell us what breaks.

Talent and mentors

Engineers and accountants to join the team, and mentors who have scaled compliance products in Asia.

Introductions to POC clients

Warm intros to TradFi institutions and Web3 firms that could become our next paid proof of concept.
