Problem

[link](#)

Payments are fragmented between wallets and local QR

Existing products solve one step. Users and merchants still manage the gaps.

Users and merchants still bridge separate payment products.

MARKET

Malaysia already scans to pay aligning with the worldwide trend.

Malaysia has strong QR habits. Visitor and digital asset activity make it a practical launch market.

3B

DuitNow QR transactions

2025, doubled from 2024

~3M

DuitNow QR touchpoints

End of 2025, mostly small businesses

RM17.14B

Regulated DAX volume

2025, up 23% year over year

\$390B

Global stablecoin payment volume

2025, more than doubled from 2024

Existing QR habits reduce adoption friction

Rewardy adds onchain payers to familiar QR checkout. Its own QR adds settlement and rewards.

SOLUTION

1

Pay directly with crypto

2

Cardless Payment
QR

3

Simplifying Crypto
Complexity with Solana

4

Diverse wallet connection
+ Swap

**A easy payment system requiring no cash, physical cards,
hardware, or complex crypto mechanism**

FEATURES

Payments Expand The Wallet Into Local Utility

The same wallet can connect onchain assets to regional spending networks and stablecoin users.

LOCAL SPENDING VALUE

Stablecoins become useful in daily life

Convert supported assets such as USDT or XAUt into TMO Point for use across supported transport and retail locations.

REGIONAL STABLECOIN DISTRIBUTION

JPYSC gains a consumer payment endpoint

Rewardy can give JPYSC holders a wallet, merchant checkout and reward experience for real-world use in Japan.

A complete in-person checkout runs on two phones

The customer pays. The merchant sees a confirmed payment.

PAYMENT FEATURE

Split Payments

Each session is independent and settles instantly to the merchant.

SAFEGUARD | Re-splitting is blocked while any session is processing, preventing overcollection.

Take payments in the app

BUSINESS

Wallet choice becomes Rewardy's acquisition loop.

Lower the adoption barrier while making the conversion benefit clear.

REVENUE

- Payment fee: **0.30%** Direct Solana checkout
- Routing margin: **0.80-1.20%** Routed or converted checkout
- Benchmark: Stripe lists stablecoin payments at **1.5%**

GROWTH LOOP

External pay → benefit shown → conversion

COMPETITION

**Others ask users to enter their payment ecosystem.
Rewardy lets users pay directly from the wallets they already have.**

Rewardy Wallet brings users. Rewardy Pay creates merchant revenues.

The winning angle

- 01 Any compatible wallet**
Open access; Rewardy Wallet adds loyalty upside.
- 02 Merchant-generated one-time QR**
Bill/order → payment request → dynamic QR.
- 03 Auto-swap + clear settlement**
Customer pays with what they hold; merchant sees final amount.
- 04 Payment → Rewards**
Turns a single transaction into repeat visits.
- 05 Unlocking 1M potential**
Instant access to 1 million potential customers.

PAYMENT INFRASTRUCTURE

Rewardy Payment Ecosystem

All integrations operate in one payment session, from any supported wallet or asset to Solana settlement and Rewardy rewards.

Why Solana for Payments

Rewardy Pay needs fast stablecoin settlement, viable economics for small payments and a checkout that hides blockchain complexity.

\$0.0013

MEDIAN NETWORK FEE

Supports small payments and frequent rewards

Near instant

SETTLEMENT

Shortens the pending state at checkout

\$200B / mo

STABLECOIN TRANSFERS

Existing liquidity for USDC settlement

What Solana enables for Rewardy Pay

Asset-flexible checkout

Jupiter targets the exact merchant amount, Kora removes the need for customers to hold SOL for fees.

Atomic commercial settlement

One transaction can include merchant USDC, the Rewardy fee and an order reference for reconciliation.

Verified rewards after settlement

Rewardy verifies the canonical transaction before awarding points or issuing a Metaplex receipt.

ONE REWARDY PAYMENT

From payment request to reward

01 Create the payment request

Solana Pay carries recipient, token, amount and order reference.

02 Authorize in a wallet

Rewardy Wallet or a Wallet Standard client signs the transaction.

03 Prepare the exact funds

Jupiter, Kora and cross-chain routes prepare the settlement asset.

04 Settle on Solana

The merchant amount, platform fee and reference land together.

05 Verify, record and reward

Helius signals the event, Rewardy verifies it before fulfillment.

Seongsu POC shows live payment demand

Five pilot merchants process 30–50 daily payments with approximately \$25K in daily volume.

LIVE POC: SEONGSU

Live payments across five Seongsu merchants

Customers pay from their wallet using a printed QR or merchant phone POS.
