

SOLANA NETWORK STATE SPRING '26

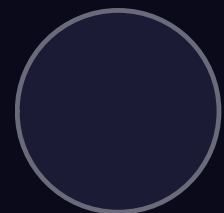

WEB MERGER

The front gate to Web3.

Web3's biggest problem isn't tech.

It's translation.

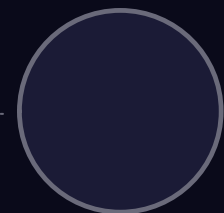

The products that could change the world have no users.
The people who need them most don't know they exist.

• WEB2 TALENT

doesn't know Web3

// THE GAP //

WEB3 PRODUCT

can't find users

Two people. One bottleneck.

Aisha

Freelance Designer · Manila

"I want global clients. Web3 looks like scams. I closed the tab."

EARNS LOCAL RATES · WANTS GLOBAL UPSIDE

A Solana project

Looking to hire · Three time zones away

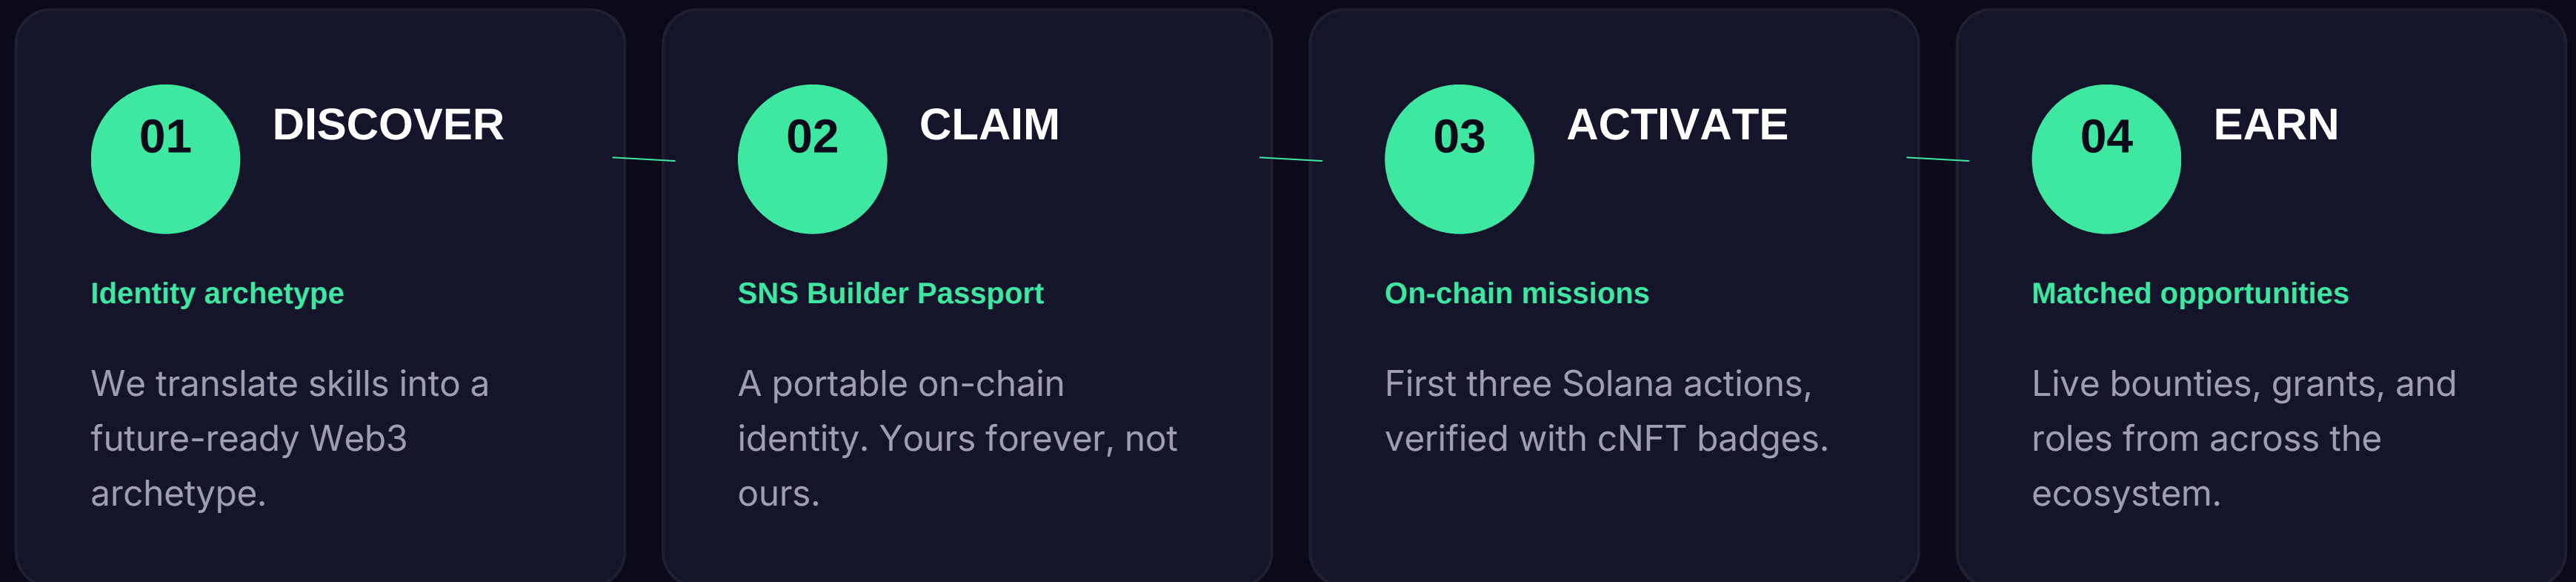

"We're paying USDC for designers. We can't find any who'll touch crypto."

BUDGET TODAY · NO USERS TO HIRE

They never meet. We're the bridge.

Web#Merger is the front gate to Web3.

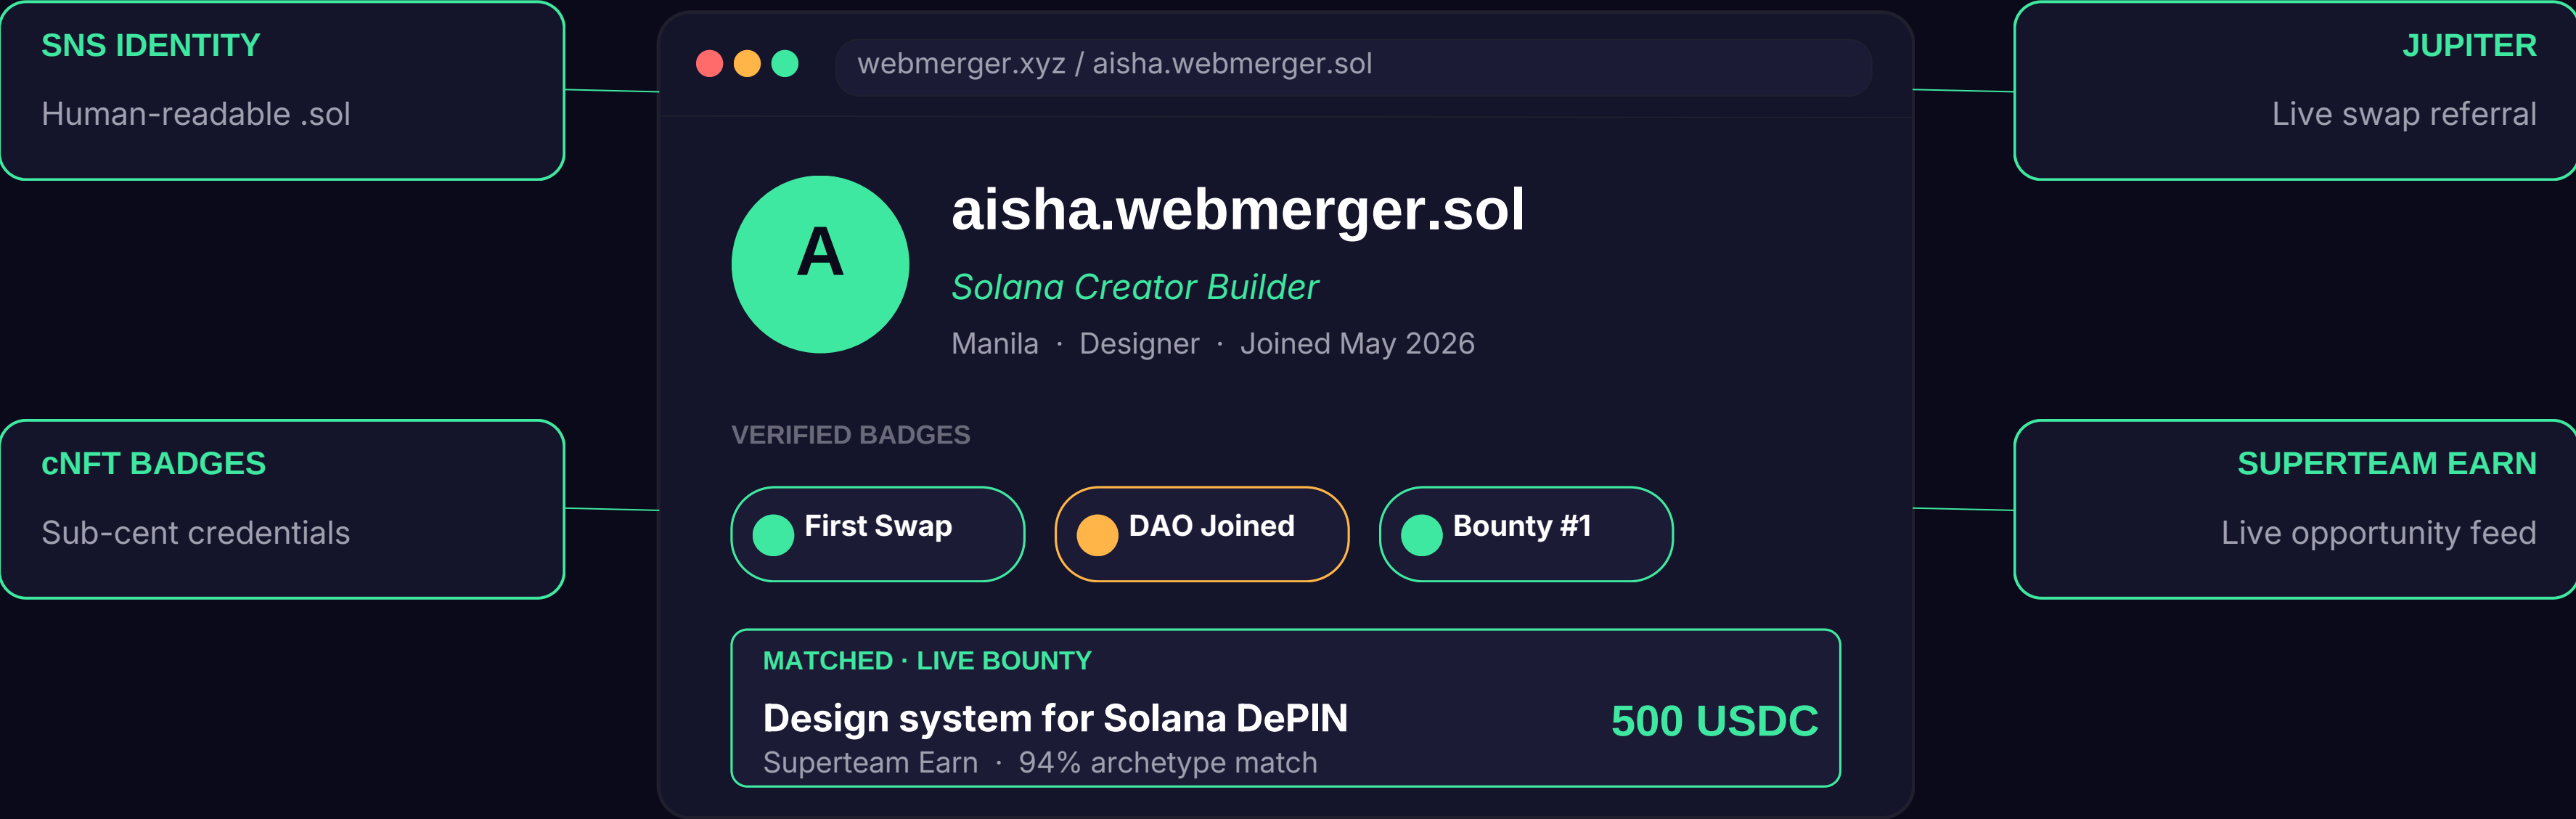

Five minutes. Web2 user → verified Solana contributor.

Not a roadmap. Not another course. An actual gate they walk through.

Built natively on Solana.

Five minutes from confused Web2 user to verified Solana contributor.

Live on devnet. Real Superteam Earn data. Real Jupiter referral fee in the demo.

How it works.

01

TRANSLATION LAYER

AI archetype matching · ecosystem mapping

Unstructured user input → future-ready archetype → matched opportunities across chains.

02

IDENTITY LAYER

SNS subdomains · cNFT credentials · on-chain proof

Builder Passport: portable, human-readable, employer-verifiable. Lives on Solana forever.

03

ACTIVATION LAYER

Live API integrations: Jupiter · Phantom · Superteam Earn

First three on-chain missions complete in 5 minutes. Every action mints a verifiable badge.

ALL ON SOLANA · sub-cent transactions · mobile-ready · consumer-grade speed

Best Ecosystems

Ethereum

\$50 billion

A decentralized platform for smart contracts and DApps.

Why: Most NFTs and Web3 content platforms are built on Ethereum.

IPFS

A peer-to-peer hypermedia protocol designed to make the web faster, safer, and more open.

Why: Used for decentralized storage of content.

WEB3MERGER FUTURE IDENTITY

Decentralized Content Pioneer

Innovating at the intersection of creativity and blockchain.

You are becoming a leader in the Web3 content space, unlocking new possibilities for creators and audiences through decentralized technologies.

Your identity. Your ecosystem. Your future.

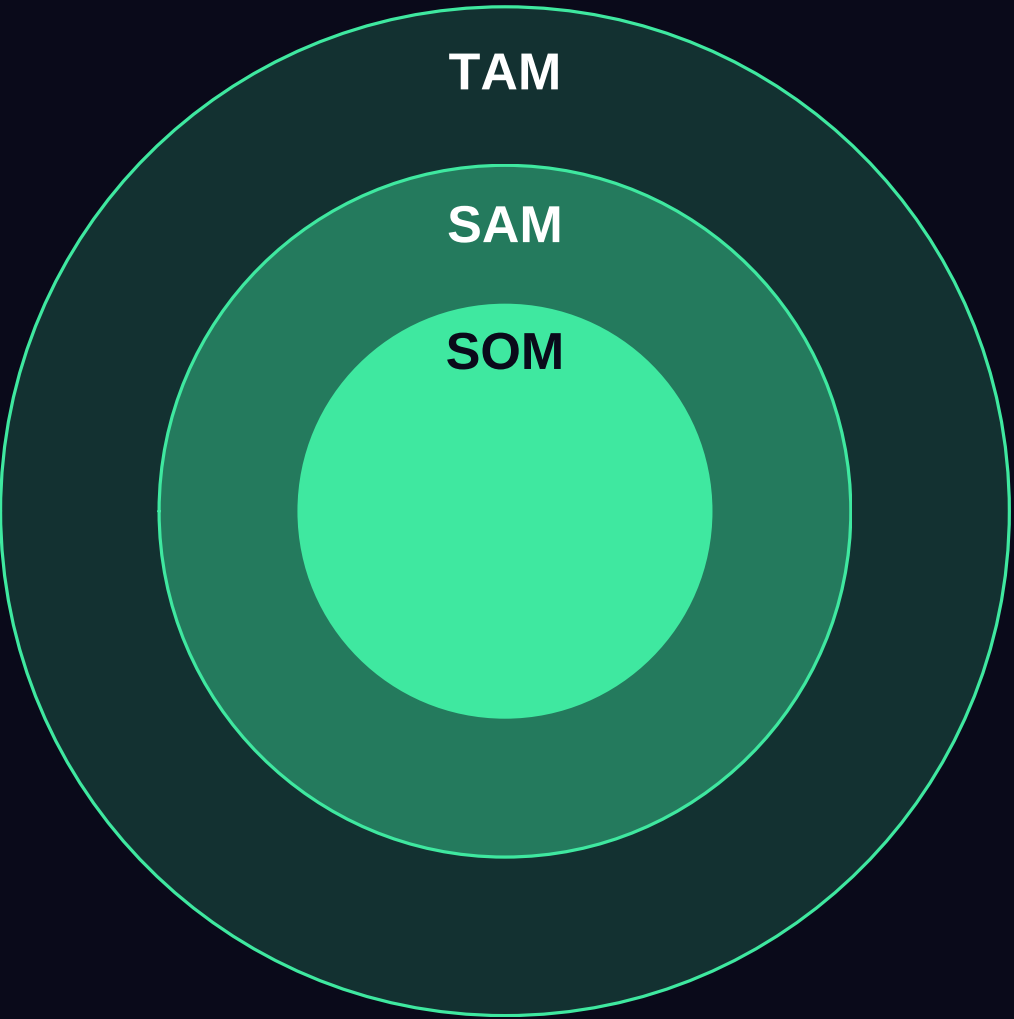

We're not competing. We're upstream.

Everyone else serves people already in the room. We're the door.

Big enough to matter.

Three rings. One thesis. Infrastructure for the next million Web3 users.

TAM **\$1B+**

Total Addressable Market

Global Web3 onboarding + identity infrastructure category.

SAM **\$50M**

Serviceable Available Market

Our wedge: SEA + India + LATAM talent + Web3 hiring.

SOM **\$5M**

Serviceable Obtainable — 3 years

50K passports × \$100 LTV · \$20 referrals + \$50 placements + \$30 subs

Comparable: Toptal does \$200M ARR in Web2. LinkedIn does \$15B. We're the Web3-native version.

Three revenue tiers. Real comparables.

Not a charity. Infrastructure with three revenue paths.

01

Protocol Referral Fees

TODAY — LIVE IN DEMO

Every Jupiter swap, Phantom signup, protocol activation pays us.

Comparable: Layer3, \$21M raised on this exact model.

02

Talent Matching Fees

YEAR 1

Web3 projects pay 10–15% of first-year comp to hire from our verified contributor pool.

Comparable: Toptal, \$200M+ ARR. Crypto-native version barely exists.

03

Subscriptions & Verification API

YEAR 2

Premium tools for builders (\$10–30/mo) and projects (\$500–5,000/mo).

Comparable: LinkedIn Premium, \$3B+ revenue. We're the verified-data version.

Tier 1 proves the model. Tier 2 scales it. Tier 3 makes it infrastructure.

Live on Solana. Built to last.

FEATURES WE HAVE

- ✓ Working MVP on Solana devnet
- ✓ SNS Builder Passport integration
- ✓ cNFT badge minting via compressed NFTs
- ✓ Jupiter swap referral integration
- ✓ Live Superteam Earn API matching
- ✓ Building publicly on Twitter / X

WHAT'S NEXT — 12 MONTHS

- Q3 '26** Beta launch — first 100 verified passports
- Q4 '26** First protocol referral integration live
- Q1 '27** First talent placement — paid revenue proof
- Q2 '27** Apply: Solana Foundation + Colosseum

We're not stopping at the hackathon. This is year one of the next ten.

The front gate.

Where the next million walk through.

The digital mycelium of Web3.

LET'S BUILD THIS TOGETHER
